

Put your observation skills to the test.

Are you ready to challenge yourself with a Science Quest?

Earn 10 housepoints for your house by completing a challenge.

This half term's challenge is to use our observation skills to predict the odd one out. There is no right answer as long as you can explain your reasoning.

Year 1 and 2 Baby Animals

Look at the images above.

1. List things that are the same and things that are different: Think about what they look like, where they are found and what they do.

Draw the odd one out and write a sentence explaining why

2. Which is the odd one out?

Braw the odd one of	at and write a sentence explaining why.
	The odd one out is the
	because

Background Science:

The baby duckling is a bird, an animal covered in feathers that lays hard eggs. The lamb is a baby sheep and the calf is a baby elephant. Elephants and sheep are both mammals, which means their mothers produce milk for them when they are young.
